

# P&G – Supplier Base Management

## SBM Supplier – Access Multiple Companies

If you are a Key user handling multiple Vendor Codes under a parent company, you can put a special request to your P&G contact to setup your login with other companies.

Once completed you will have User Switch option enabled and you would be able to Switch to different company from one account.

Step 1. Click on the persona icon on top-right, and click Switch User.

Step 2. Look for the company you are enabled for, and click on the link in front of it. You should now be in that portal.
